chosen project idea			
Develop a project plan that includes	Collaborate with team members to		
task assignments and timelines	execute the project plan	Evaluate project outcomes and	
		identify areas for improvement	

Note: Absence of trainee must be indicated on the log book

#### Details of main job

The main job appears to involve a mix of communication, research, analysis, and project planning.

The first task involves introducing oneself to the staff, which would likely involve meeting with team members, learning about their roles and responsibilities, and getting a sense of the company culture and values.

The second task involves briefing the team on the company's objectives and vision, which would provide context for the work being done and help align everyone towards a common goal.

The third task involves studying and researching more about the company, which would likely involve reviewing documents, reports, and other materials to gain a deeper understanding of the company's history, structure, and operations.

The fourth task involves analyzing the problems in the company, which could involve conducting surveys, gathering data, and analyzing feedback to identify areas of improvement or potential issues that need to be addressed.

The fifth and sixth tasks involve participating in HEROUS DAY, which could involve team building exercises, workshops, or other activities aimed at fostering collaboration, creativity, and innovation.

The seventh and eighth tasks involve continuing work from the previous day and developing project ideas. This could involve brainstorming, researching, and evaluating different project concepts to determine which ones are feasible and aligned with company goals.

The ninth task involves studying and researching more about the chosen project idea, which could involve reviewing industry trends, conducting market research, and analyzing customer needs to ensure the project is well-informed and relevant.

The tenth task involves defining project goals, which would involve setting clear objectives for the project and establishing criteria for success.

The eleventh task involves defining project objectives, which would involve breaking down the project goals into smaller, more manageable tasks that can be assigned to team members and tracked over time.

Overall, the main job involves a mix of strategic thinking, research, analysis, and project planning, and requires a high level of communication and collaboration with team members to ensure success
